

# MOBILE FENCE M500 + CORNER BRACKET

## Anti-climb temporary fencing

### Temporary fencing designed for high-security needs

The M500 Anti-Climb from Heras features a narrow mesh opening that resists climbing. The result is fewer accidents and less theft. The welded corner brackets gives the panel frame extra strength and a longer service life.

### Secure, durable and easy to install

The mesh is pre-galvanised with no sharp zinc residues making it safe to handle. The panels can be assembled by one person and field research has shown more panels can be placed in less time. The M500 Anti-Climb panel is welded all around making it suitable for attached privacy screens, banners or custom signage.

### Mobile fencing with extra strength

In addition to the standard version, panels can be equipped with an additional vertical centre tube providing the frame with extra rigidity and reduced torsion. 8' height is available as a custom order.

## SPECIFICATIONS

Dimensions Width (feet)	11.48
Dimensions Height (feet)	6.56
Mesh opening Height (inch)	6.3
Mesh opening Width (inch)	1.57
Package quantity	68
Weight (Kg)	23.00
